

Enhancing Medication Safety

Easily and accurately report medication errors and near misses to proactively identify areas of potential risk and implement action plans that improve safety and quality in care homes, senior living, hospice or pharmacy practices.

Why Pharmapod?

- **Streamlines reporting for ALL stakeholders**, analysis and data summaries for quality teams resulting in a **minimum ROI of 2 hours savings per week**.
- Improves medication incident analysis via Pharmapod's **cloud-based software** using a **standardized, rigorous incident analysis framework**.
- **Controls data analysis via role-based access** for organizational autonomy over analytics and cross sector integration for collaborative work **in one platform**.
- **Provides standardized data** for quality reporting programs to support homes & pharmacies Continuous Quality Improvement (CQI) to **radically reduce errors & mitigate risks** over time.

Pharmapod Key Features

Save Time and Simplify Reporting

- **Collaborative, interactive digital workflows** for documentation, recording, case management, risk matrix, root cause analysis, action planning and improvement implementation **across multiple clinical settings**.
- **Eliminate duplicate reporting** to regulators and/or national databases.
- **Click of a button** preparation for regulatory audits or inspections.
- **Automated escalation rules** to ensure management and executive levels are appropriately notified.
- **Executive/board meeting preparation** is quick and easy with instant charts, event trend analysis, root cause analysis, normalizations, reporting rates, safety reports, risk management results, & privacy breach records.

Enhance Resident Safety

- **Monitor resident safety in real time** with dashboard visibility for leadership and quality teams.
- **Link Home and Pharmacy reports** (allowing reporting, investigation, learning and collaboration between multiple locations) **as well as change root cause as needed**.

Improve Insights and Collaboration

- **“Insights Pro” module saves organizational resources** providing executives access to corporate level, real-time data.
- **Data insights available within each home** delivering autonomy over internal data as well as **aggregated benchmarking** with other homes regionally.
- **Track and assign actions or communicate learning points within quality teams and/or outside stakeholders** such as the clinical consultant pharmacist, regional consultant, family/caregiver, medical director or attending physician.
